d. Discussion took place on Project TAGBOARD. It was agreed that CIA must maintain a full control of the "skunkworks", including all contracting and security. This was necessary in order to insure that OXCART receives priority necessary to get into immediate operation. Mr. McCone stated that it was agreed that some Air Force technical men could be placed in our organization as the means of training and familiarization. I asked if this meant that at a later time operational control would go to the Air Force. Mr. McCone said that this had not been decided and would not be worried about until after the A-12 is flying.

5. I reported on the progress of 9056 at which time Mr. McCone asked that we insure coverage of Egypt with this operation. *(memo attached)*

6. Also reported were:

a. NRO's direction to buy four new ARGON payloads.

b. Delivery of the first AF-12.

c. A request by State and NRO for OXCART clearance for Mr. William R. Tyler, Assistant Secretary for European Affairs. On this item Mr. McCone said to delay clearance until he received a request from Secretary Rusk. OSA has been informed.
